Magic!

Some say it's influencing the natural flow of energy for beneficial means. Others see it as a way to surpass the mundane everyday living patterns that we've set for ourselves.

After-all, how could magic not be possible, if we arguably use 10-15% of our mind's power.

Magic – children believe in it and with trust and faith, doors in this world open. There are many forms of magic and magick. One of which, is Personal Magic.

I define personal magic as a true connection to one's soul, a true respect of it's wishes and secrets. Personal magic does not depend on religion, nor groups of like-minded individuals – alas, it is a form of listening...

And hearing what your soul whispers to you, where it guides you and how you should stand protected against the many negative energies that may challenge you along your way.

Seeds are a very important part of our internal psyche – people who manipulate us – they plant seeds of control within us, and by promising or accepting requests that your soul does not believe in, we have the tendency to chain ourselves to hateful situations.

Once freed from dethroning seeds – it's best to spend time with the self. Healing, wishing love onto others and ...

When strength arrives ... **CREATE**

Creation is our gift from above and it fills us with inspiration and creates the kind of energy around us that brings forth interest and care.

This is my cycle of Personal Magic. A magic that works in partnership with Belief and Faith.

M. Tank
